APPENDIX E-093 V

NOTIFICATION OF LOGISTICS REASSIGNMENT (LOSS) VIOLATIONS

1. INPUT DOCUMENT

   Appendix B-93, Notification of Logistics Reassignment (Loss), DIC ZSL.

2. INPUT TO PROCEDURE DECISION CHART

   Notification of Logistics Reassignment (Loss) Transactions.

3. PURPOSE, CONTENTS AND RESPONSIBILITIES

   This appendix provides instructions for the research, correction, and
reentry of Notification of Logistics Reassignment Loss documents which
have violated. Violation Reason Codes, in alphabetical order, are
listed below. The Materiel Support Branch, Logistics Programs Division,
Directorate of Supply Operations, is responsible for processing all
these violations.

VIOLATION
REASON CODE	DEFINITION
AC	RIC to Invalid, Blank, or Unmatched.
AY	NSN Invalid, Blank, or Unmatched.
CI	NSN Deleted With or Without Replacing NSN.
CU	NSN Coded Logistics Loss.
TF	Effective Transfer Date Invalid.

4. PROCESSING/RESEARCH INSTRUCTIONS

   a. VRC AC.

      (1) REASON FOR VIOLATION/ERROR CONDITION

        Violation Reason Code AC indicataes that the RIC of the Gaining
Inventory Manager (GIM) is blank or invalid..

      (2) PROCESSING/RESEARCH REQUIRED

        Processing personnel should review input documents and replace the
blank RIC with a correct RIC TO.

b. VRC AY.

      (1) REASON FOR VIOLATION/ERROR CONDITION

      Violation Reason Code AY indicates that the NSN contained in pos.
4-16 of this mechanically developed input transaction does not match an
NSN in the NIR or, the GIM NSN, in pos. 25-37 is nonnumeric. Since the
input is mechanically generated based on catalog changes/actions, the
reject indicates programming deficiencies or errors.

      (2) PROCESSING/RESEARCH REQUIRED

      Processing personnel will contact the Directorate of Technical
Operations to determine the correct NSN and to initiate action for
correction. After errors/deficiencies have been corrected, then reenter
the corrected document in accordance with paragraph 5. Notify DSAC-O,
through appropriate channels, if a system deficiency does exist.

   c. VRC CI.

      (1) REASON FOR VIOLATION/ERROR CONDITION

      Violation Reason Code CI indicates that the NIR reflects an NSN
with a deleted NIR Key Code.

NOTE: Any Key Code D_ except DX or DZ.

      (2) PROCESSING/RESEARCH REQUIRED

      Processing personnel will initiate corrective action in
coordination with the Directorate of Technical Operations since there is
no requirement to produce DIC ZSL transactions for deleted NSNs.

   d. VRC TF.

      (1) REASON FOR VIOLATION/ERROR CONDITION

      Violation Reason Code TF indicates that the Effective Transfer
Date in pos. 17-21 is other than two digit year (pos. 17-18) and three
digit day,   001-366 (pos. 19-21).

      (2) PROCESSING/RESEARCH REQUIRED

       (a) Processing personnel will initiate corrective action in
coordination with the Directorate of Technical Operations.

       (b) The correct ETD will be determined by review of appendix F-26,
copy of DIC YCG input and/or other in-house LR documents.

5. REENTRY INSTRUCTIONS

   a. Review remaining data elements contained in violation output
document to detect any other invalid data and correct as necessary.

b. Reentry method for violations is contingent upon type of violation output document which is a local option and recorded in the Output Routing Code Table (appendix F-20). The violations are output through the Online Violation Process. This process is available using the SAMMSTEL Verb SVRR. Refer to DLAH 4745.2, Volume I, Part 1, DLA Remote Users Handbook, SAMMSTEL for processing assistance.

6. FLOWCHART

   Flowchart not required.
